

"The Lord is good to all; he has compassion on all that he has made."
(Ps 145:9)

God is described in this WORD of Life. It speaks of his tender love, which is overflowing like that of a mother. He is merciful, forgiving, slow to anger, great in kindness, good to everyone.

God entrusted his creation to the work of men and women, like an «open book» in which we can learn how good he is.

Unfortunately, however, we see all around us that the environment is being irresponsibly damaged, and people who are often helpless, with no one to defend them, are being hurt or wounded in various ways.

Many people don't care about protecting nature or their fellow human beings. They abuse our natural resources for personal gain, with no consideration for the common good.

Why don't we take advantage of our free time, and all the opportunities we have during the day, to appreciate the beauty of creation.

This will help us recognize the power and majesty of our Creator who loves life so much. It will increase our faith and hope in his infinite goodness, knowing that he will always care for all he created.

We are ALL called to work together with God, the Creator of the universe, and to give our contribution to increase justice and peace in the world, in accordance with his plan of love.

THE EARTH: EVERYONE'S HOME

Let's choose a simple lifestyle for ourselves as individuals and for our families, being respectful of the environment and considering the needs of others when we make choices. In this way we will become rich in love and not in possessions.

Let's share the resources of the earth with our less fortunate brothers and sisters. Let's give witness to how full life can be and let's bring joy, goodness, tenderness and reconciliation wherever we are.

Hey! Look at how many things we can do to reach our goal!
